FLANNEL GUARD™

The precious, long hours you spend maintaining your car's high-gloss finish just got shorter. Flannelguard has a 100% cotton outer layer with an ultra-soft, 100% pure cotton flannel lining that provides an enhanced shield against trapped moisture, to prevent paint from blistering and gloss from diminishing. The extra flannel lining also offers superior ding protection for your show car finish. Custom made Flannelguard covers are softer, repel dust better and breathe easier than the competition. Ideal protection from dust and dirt, these covers are not recommended for rain and snow, though they do offer excellent UV sun protection.
